This paper was published in the January 2008 issue, Volume 152, Number 1, pp. 59–77 (Angulo & Reichle, 2008).

The Authors would like to draw readers' attention to an error in their paper.

On page 67, under the heading 'Etymology', the following statement was published.

The new species is named after the coca plant, *Erythroxylon coca*, given its occurrence near coca plantations of the Chapare region, in Bolivia.

The orthography of the genus was incorrect and it should have read:

The new species is named after the coca plant, *Erythroxylum coca*, given its occurrence near coca plantations of the Chapare region, in Bolivia.
